

## *Review Comments*

Paper ID	ICOECA-287
Title	DDoS Protection System for Cloud using AWS and Machine Learning
Decision	Accept with major revision

### **Review Comments:**

Abstract should specify the exact issue and outcome of the research work.

Ensure that all figures and tables in the manuscript are appropriately cited in the main text.

Analyze the limitations of existing works in detail and provide the research gap clearly in the introduction or literature review sections.

Include a comparison summary table in the results or discussion section.

Ensure all the references are cited in the text.

The conclusion part should be enriched, with more discussions on the shortages, challenges and opportunities.

Avoid the phrase "this paper". and expand the keywords. The reference should follow the IEEE standard citation format and revise the publication details which are unrelated.
